Question 9

The suggested commands must be just followed:

Problem1

Open the utility, specify the relation and show its structure

Commands Sequence:

```
bq
rel ABC
dl
x
```

Problem 2

The relation is already on screen, but we only need to use the "re f" and "re l"

Commands Sequence:

```
bq
rel XYZ
re f
re l
x
```

Problem 3

Read key value 10 and the next 2 records, we have just to pay attention to the key reading

Commands Sequence

```
bq
rel XYZ
key 10
re k
re n
re n
x
```
